BANKING!

Our client offers individual advisory services and asset management for private and institutional clients and has been active worldwide for decades. The growing Avaloq team in Zürich is looking for a:

SENIOR AVALOQ DEVELOPER

YOUR RESPONSIBILITY You will be responsible for owning and developing software solutions in Avaloq and surrounding applications. You will also be tasked with improving and maintaining existing tailored solutions in Avaloq.In this role, you will work closely with our business owners to define functional requirements and act as a technical project lead in your area of responsibility. You will oversee testing campaigns and activities for solutions developed in your domain, coordinating your work with developers in related areas as well as internal and external stakeholders. Additionally, you will be responsible for planning and managing the development pipeline in your area of responsibility. You will also have the opportunity to train junior members of the team and provide guidance to other developers.

YOUR PROFILE You possess a bachelor's or master's degree in computer science or software engineering. You have a strong understanding of banking and finance and solid software development knowledge, especially in Avaloq. You work proactively and take responsibility for the entire development lifecycle. What sets you apart is your ability to work alone, in a team and with other stakeholders Business fluency in English is a must.

YOUR PERSPECTIVE Join a dynamic and innovative team at a leading private bank. Expand your skills and make the best use of your knowledge.
