

## INFORMATICS

RÉFÉRENCE: 10978

PUBLIÉ LE: 23.04.2024

**JOIN A GREAT TEAM!** Our client is one of the leading companies in Switzerland in the management of information systems. This company, made up of passionate specialists in advanced IT infrastructures, enables its clients, through its professional services, to focus on their core business.

We are now looking for an experienced person as:

### ORACLE DB CONSULTANT (80-100) % - BERN

As main contact for our client's customers and thanks to your responsible and independent way to manage your activities, you will successfully implement the projects you are accountable for.

#### ACCOUNTABILITIES

- Installing, maintaining, managing, and patching the Oracle Appliance on bare-metal servers using virtualization technology
- Migration of databases in on-premises and cloud-based environments
- Patching and updating databases. Using Ansible for large-scale patching
- Implement and configure HA databases (Data Guard for EE version, dbvisit for SE version, RAC, etc.).
- Propose new solutions to meet customer needs (snapshots, container database, etc.)
- Implement, configure, and manage database backups.
- Restore databases after an incident.
- Replicate and move data using various technologies (RMAN duplication, Export/Import Data Pump, etc.)
- Data replication, filtering, and transformation with Oracle GoldenGate
- Solve database performance problems (study and analyze database performance)
- Oracle database management and troubleshooting (user support)
- Audit licensing.
- Creation of shell scripts as well as SQL and PL/SQL scripts
- Development of technical documentation for projects and solutions

#### YOUR PROFILE

- Superior school diploma in IT sciences
- Relevant experience with Oracle database servers
- Excellent knowledge and extensive experience of Oracle RMAN backup and restore.
- Familiar with Oracle tuning
- Knowledge of high availability using DataGuard or Real Application Cluster
- Team player
- Fluent in **German** as well as good English.
- Knowledge of Apex and PL/SQL.

Joining our client means integrating a dynamic company labeled as a "[Great Place To Work](#)" with highly skilled experts, which will develop your technical knowledge in a very motivating environment.
